

NEW PRODUCT RELEASE, November 2015

PolyWear™ Disposable Barrier Gowns, 7 Colors Now Available

PolyConversions, Inc. is the U.S.A. manufacturer of *PolyWear* Personal Protective disposable smooth gowns designed for food processing, bio-hazard as well as chemical protection. PolyConversions' Gowns feature full frontal coverage with a contoured thumb loop design, securing the gown's sleeves under the employee's protective glove. One-piece construction with a single heat-sealed seam behind its sleeves reduces the potential for "pass-through" of fluids and other contaminants. PolyConversions' *PolyWear* Smooth Large Gowns are now available in 7 popular colors (Blue, White, Yellow, Green, Orange, Red & Purple) offering color coding opportunities in order to separate departments and applications, as well as for employees' personal protection.
